

Air Conditioning Hose Selklima

Tube: special butyl rubber with very low gas permeation.

Reinforcement: 1 high tensile synthetic textile braid.

Cover: special synthetic PIN PRICKED rubber, resistant to high temperature applications.

Temperature range: from -30°C up to +125°C.

Application: for the transport of R134A gas and liquid, in air conditioning systems for automotive industry.

Norms: SAE J 2064 TYPE A CLASS 1.

Recommended lubricants: only PAG.
